

Turning Flooring Into Floors

Complete Project Management

Our Experience Makes the Difference

At RCC Flooring, we've been in the commercial flooring business for over 50 years. We attribute our longevity and success in this business to many things. Our ability to listen and communicate. Our foresight to incorporate the latest technology in the flooring industry. Our understanding of the ever-changing regulations and building codes. Our capacity to see, and plan for, the entire scope of a project — from design inception through maintenance. Our dedication to the family values our business was founded on. And, quite simply, our old-fashioned commitment to exceptional quality and craftsmanship.

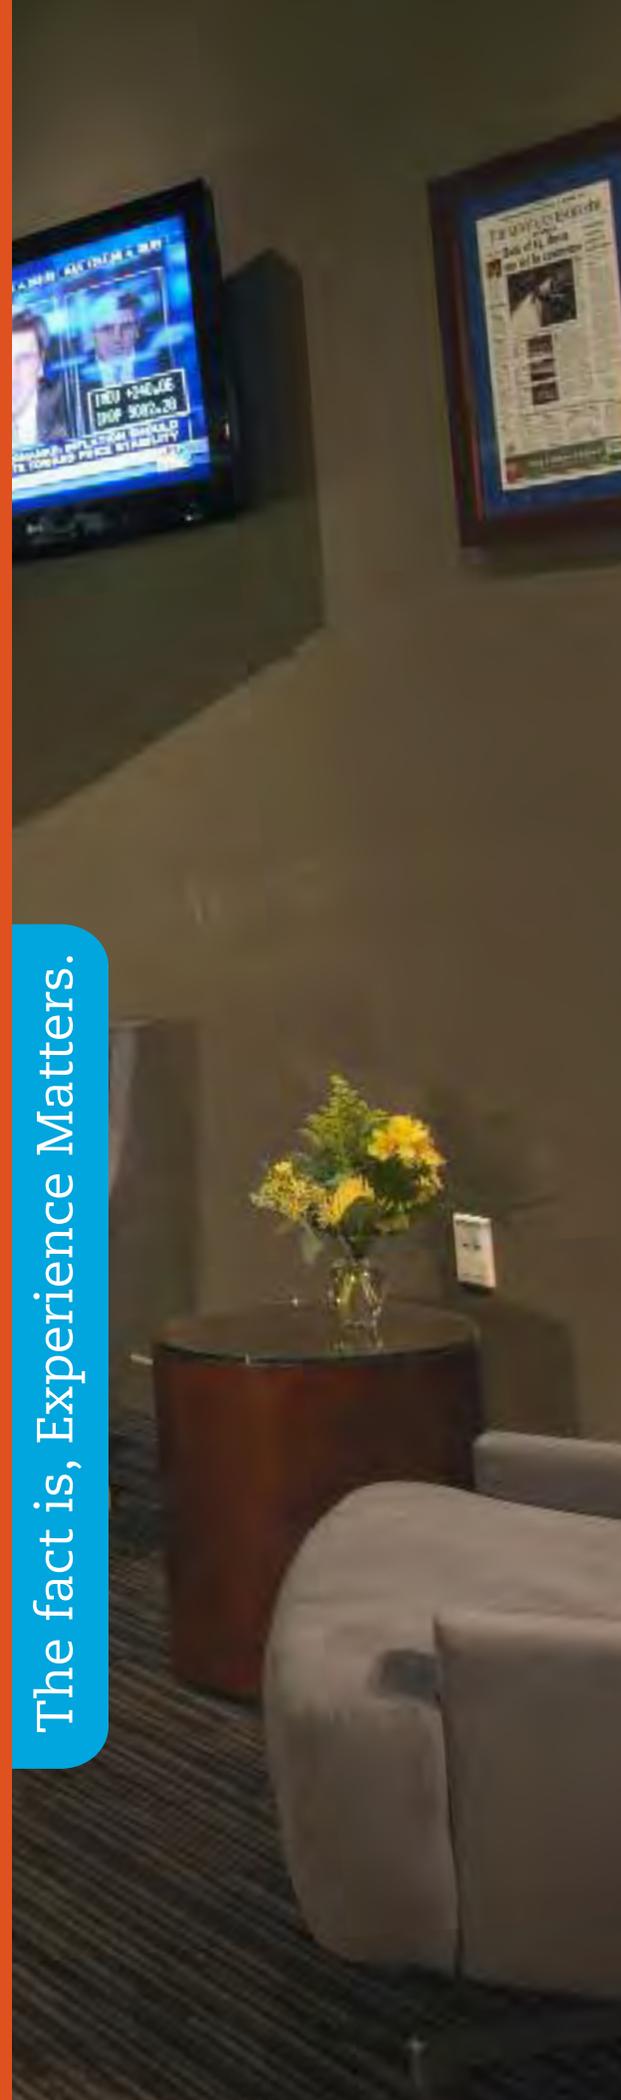

The fact is, experience matters. There are many facets to each flooring project that you may not even be aware of or have the time or resources to deal with, including:

- ❑ Pre-Installation
- ❑ Site Analysis & Layout
- ❑ Budgeting
- ❑ Planning
- ❑ Estimating
- ❑ Unbiased Material Selection
- ❑ Purchasing
- ❑ Insurance Issues
- ❑ Environmental Issues
- ❑ Work Code & Regulation Compliance
- ❑ Anticipating "Down-the-Road" Costs
- ❑ Delivery & Warehouse
- ❑ Removal & Disposal
- ❑ OSHA Regulations

Our team is completely experienced and knowledgeable in all these areas. And it's this experience and single-source accountability we'd be happy to put to work for you on your next flooring project.

The fact is, Experience Matters.

24/7 Business

Most facilities have “closed” time or slow time, that’s when renovations should take place, not during your busiest, “open” times.

That’s why we pride ourselves on serving your commercial flooring needs 24/7. We work closely with your schedules to absolutely minimize disruption and downtime. We understand the negative effect and inconvenience that you, your staff and your clientele would otherwise endure. We also know that flooring needs to be safe and functional for it’s intended traffic usage.

- 24/7** Planning and service = hassle free flooring renovations.
- 24/7** Means nimble and responsive, big or small you’ll receive unparalleled customer service.
- 24/7** Planning and service from RCC Flooring is a hallmark of how we’ve earned our reputation for excellence.

Minimize Downtime.

Maintenance: Long Live Your Floor

To keep your new floor looking great and performing at its best requires a structured maintenance plan. It extends the look of your floor, as well as its life cycle.

A properly maintained floor also promotes the health and well-being of employees. By using the right environmentally responsible mix of maintenance chemistry and processes to keep your floors bright and clean, you maintain a healthier work environment for your employees. That means fewer sick days and greater productivity.

At RCC Flooring, we help you devise a cost-effective flooring maintenance plan and ensure that the maintenance service you receive will produce the best results by developing an optimal schedule and using the right products for your floor. Because we're a Starnet Member, we're not bound to any mill or cleaning product manufacturer, which means our maintenance recommendations are completely unbiased. They're based on what works best for your flooring.

Regardless of who installed your flooring, we know how to take care of it. Because the flooring project doesn't end once the floor is installed. It's part of our job to see that it lasts for years and years to come. And it's part of our commitment to single source responsibility and one-stop service.

Extend the life and look of your floor.

Have We Covered Everything? Quite Possibly

Within each industry there are special challenges. For example, we've worked extensively with healthcare facilities to install floors that were highly functional, serviceable and sanitary, yet still have eye-appeal. Within the corporate and educational sectors, again functionality was imperative. We installed raised access floors to house a multitude of wiring and cable networks. Yet these floors had to be incredibly durable and resistant to the wear of heavy foot traffic. We've often worked in the public space arena where floors need to be as safe and rugged as they are beautiful to look at. What it comes down to is that we've run the gambit. We've successfully completed projects using all types of flooring materials, for all types of purposes for all types of clients both locally and nationally.
